## ACKNOWLEDGEMENT

The Mini project would not have been possible without the guidance, assistance, and suggestions of many individuals. I would like to express our deep sense of gratitude and indebtedness to each one who has helped me to make this project a success.

We heartily thank our beloved Principal, **Dr. B Sadashive Gowda** for his wholehearted support and for his kind permission to undergo the mini project.

We wish to express our deepest gratitude to **Dr. Rajendra A B**, Head of Department, Computer Science and Engineering, VVCE, for his constant encouragement and inspiration in taking up this mini project.

We gracefully thank our mini-project guides, **Mr. Yashpal Gupta S** and **Dr. Prashanth M V**, Assistant Professors, Dept. of Computer Science and Engineering for their encouragement and advice throughout the course of the mini project work.

In the end, we are anxious to offer our sincere thanks to our family members and friends for their valuable suggestions and encouragement.

**SUNIL B (4VV19IS105)**

**YOHAN SWAMY (4VV19IS125)**

## **ABSTRACT**

The agricultural information system provides its users and researches to get online information about, the crop, statistical details and new tendencies. The trends of the crops act so that these will be pretty important to the users who access these via the Internet. The main features of the information system include information retrieval facilities for users from anywhere in the form of obtaining statistical information about fertilizer, research institutes and researches, land availability, diseases, suitable soil concentration for the corresponding crops, statistical information about exports and etc. In addition, this provides individual information about Intercrops related to main crops. The system allows the retrieving facilities but also the updating facilities to the authorized persons in the corresponding institutes.
